Subject: Shady Acres ESA

Hi Fran,

I have a question. The Shady Acres ESA was signed on 12/10/22, which means we have until 3/10/23 to file it. Obviously that is this Friday. After she had the tank inspections, it was recommended that she get emergency vents on the tanks. She finally was able to get someone out last week, but they won't be able to get it done this week. I know this isn't what we're supposed to do, but can I go ahead and file it? I was thinking since technically we don't require emergency vents, that it would be alright to file it. I'll still follow up to make sure they get those installed. Thanks.
